

ICAR-CIFE ITMU unit participated in Farmers-Scientist interactive meet organised by Department of Fisheries, Satara on 19.03.2024

The Institute Technology Management Unit of ICAR- Central Institute of Fisheries Education, Mumbai participated in Farmers-Scientist interactive meet organised by Department of Fisheries in Satara, Maharashtra, on 19.03.2024. During the event, a range of innovative technologies developed by ICAR-CIFE was showcased, offering valuable insights and opportunities for farmers and entrepreneurs in attendance. At the scientist-farmer interaction meeting, a diverse group of 65 farmers from various regions actively participated. Dr. Kapil Sukhdhane, Scientist delivered an informative presentation covering key topics such as cage farming, biofloc fish farming, water quality management in aquaculture, and the development of value-added fish products. Additionally, he emphasized the importance of introducing farmer-friendly technologies tailored specifically for the needs of fish farmers. Mr. Virkar, the Fisheries Development Officer representing the Department of Fisheries in Satara, extends his gratitude to the ICAR-CIFE ITMU unit for their active participation and engagement with farmers during the event. The interactive session was participated under the guidance of Dr. S. P. Shukla, Principal Investigator, ITMU-ABI unit of ICAR-CIFE. Glimpse of the programme is given below;
