

**NAHEP-sponsored skill development program on "Quality control and certification of fish and fishery products" conducted from January 6-10, 2020**

The Post Harvest Technology department of ICAR-CIFE organized a 5-day National Agricultural Higher Education (NAHEP)-funded skill development program (SDP) on "Quality control and certification of fish and fishery products" from 6-10 January 2020. The program was inaugurated by Director & Vice-Chancellor Dr. Gopal Krishna, and attended by 20 undergraduate students from different state fisheries colleges and 7 post graduate students. The training program consisted of theory and practical sessions on quality and safety management of fish and shellfish products, microbiological and biochemical methods of quality assessment, quality management systems, national and international regulations, and entrepreneurship development. The trainees visited Export Inspection Agency (EIA), Mumbai as part of their practical learning program. The sessions were interactive and included hands-on practical sessions conducted by experts.
