

**Skill Development Programme on
Prospects of biofloc technology in aquaculture
3-7th October, 2022
ICAR-CIFE, Rohtak Centre**

Training Report

ICAR-CIFE, Rohtak centre organized a skill development programme on “Prospects of biofloc technology in aquaculture” from 3-7th October 2022. The programme was customized for participants from Veraval, Gujarat. A total of 7 participants of which 2 were officials from Department of Fisheries, Veraval, Gujarat attended the program. There were 10 theory classes and 5 practical classes including a field visit to biofloc fish farm. The theory classes dealt with various aspects of biofloc aquaculture including, overview of aquaculture, site selection, biofloc inoculum development, design and construction of biofloc tanks, species selection, water quality management, pre stocking and stocking management, disease control and prophylaxis, feed and feeding management and cost benefit analysis of biofloc farming. The various aspects related to theory were practically demonstrated and the participants were given hands on training. The feedback from trainees were collected and they were enthusiastic to begin with the biofloc culture in their native state.
